Seed Saving Workshop
Tuesday, February 24, 2015
6:30 – 8:30PM
Zabriskie Hall Room 009, Wells College

Saving your own seeds is a fascinating and rewarding skill that can help increase self-sufficiency and save money while increasing agricultural biodiversity. This class will cover basic information to get you started saving your own vegetable, herb and flower seeds this summer. Learn the difference between open pollinated and hybrid varieties, which types of seeds are easiest to save, cross-pollination vs. self-pollination, and how to easily incorporate seed saving into your food and flower gardens. The workshop, which will also include a hands-on demonstration on cleaning different types of seeds, will be led by Chrys Gardener, Commercial/Community Horticulture Educator for Cornell Cooperative Extension of Tompkins County.

Cost: $5-$10 self-determined sliding scale (free for Wells College students)

Advance registration is requested. Contact the Wells College Center for Sustainability and the Environment at 364-3304 or email Marian Brown at mbrown@wells.edu.

Wells is committed to providing access to all events; anyone needing assistance should contact the Wells Center for Sustainability and the Environment at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.

The education of an extraordinary life.
