

Sustainability Perspectives

Auburn Permaculture Park: *A source for community transformation*

Permaculture is an ethical and ecological design system for creating regenerative human environments patterned after nature. By replacing resource intensive lawn with edible forest gardens and installing food forests in public parks and along public pathways, we can make fresh fruits, nuts, and vegetables abundant and available for everyone. One year since its inception, *Auburn Permaculture Park* is already generating positive reverberations throughout the community. Co-founders **Peter Cramer** and **Laura Kennedy** will highlight the opportunities and challenges encountered in starting a permaculture park in a small city, and share how this volunteer initiated and run project has become a source for community transformation.

Monday, November 7, 2016 ~ 12:20 – 1:20PM
deWitt Lecture Hall, Zabriskie Hall Room 106

All *Sustainability Perspectives* series events are free and open to the public.
The series explores the concept of 'sustainability' from a variety of viewpoints.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, Center for Sustainability and the Environment, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.
