

Sustainability Perspectives

Resilient Seeds in a Changing Climate

Petra Page-Mann, co-founder of *Fruition Seeds*, will explain how seed, the foundation of food and of civilization, is now a commodity, after millennia of being shared as a commons. After losing over 80% of the genetic diversity of our agricultural crops in the last century, innovative models are reconnecting food systems and civilizations as never before, right here in the Finger Lakes. You play a larger role every day than you realize.

Monday, February 27, 2017 ~ 12:20 – 1:20PM
deWitt Lecture Hall, Zabriskie Hall Room 106

All *Sustainability Perspectives* series events are free and open to the public.
The series explores the concept of 'sustainability' from a variety of viewpoints.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, Center for Sustainability and the Environment, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.
