

Sustainability Perspectives

“Invasive Threats to Water Quality”

Bruce Natale, P.E., is the Environmental Engineer for Cayuga County Planning and Economic Development. He will discuss how the quality of our drinking water can be negatively impacted by non-native plants and animals that out-compete native species and disrupt normal ecological balances. Aquatic invasives in Cayuga Lake include Asian clam and Zebra mussels, Eurasian Watermilfoil and Hydrilla. Even terrestrial invasives like Hemlock Woolly Adelgid can negatively impact waterways feeding into the lake.

Monday, November 9, 2015 ~ 12:20 – 1:20PM
Stratton Hall Room 209

All *Sustainability Perspectives* series events are free and open to the public.
The series explores the concept of sustainability from a variety of viewpoints.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, Center for Sustainability and the Environment, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.
