

Dr. David Wolfe is Professor in the School of Integrative Plant Science at Cornell University. His research and outreach efforts focus primarily on climate change adaptation and mitigation, and soil health and water management.

In addition to peer-reviewed research publications, science communication efforts include writing commentary for the popular press and analyses for policy-makers, such as co-authoring the 2008 and 2014 U.S. National Climate Assessments.

At Cornell, Dr. Wolfe currently teaches courses on climate change and environmental science writing, provides leadership for the New York Soil Health program, and is on the Advisory Board for the New York State Water Resources Institute.

At the community level, David serves on the Board of the Cayuga Lake Watershed Network, and is a member of the Lansing Conservation Advisory Committee.
