

Sustainability Perspectives

Sustainable Architecture:

exploring and unraveling elements of healthy, livable and resilient buildings and communities

Dennis Andrejko, head of the department of Architecture for the *Golisano Institute for Sustainability* at RIT, will explain that service to society is at the core of the architectural profession. In a multitude of ways, the architectural design process explores methods and suggests solutions to enrich and improve not only buildings, but also regions, communities, and neighborhoods. Sustainable architecture provides an opportunity to provide cutting-edge design that is high performing, energy efficient, environmentally sensitive, and contextually driven. This presentation shares ideas centered on forward-thinking sustainable built environments that ultimately enhance the health, well-being, resiliency and vibrancy of those we serve.

Monday, February 4, 2019 ~ 12:20 – 1:20PM
deWitt Lecture Hall, Zabriskie Hall Room 106

All *Sustainability Perspectives* series events are free and open to the public. The series explores the concept of 'sustainability' from a variety of viewpoints.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, Center for Sustainability and the Environment, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.
