"The Whole Fracking Enchilada"

Sandra Steingraber

This ecologist, activist, and acclaimed author of *Living Downstream* explores the links between human rights and the environment, with a focus on chemical contamination, climate change, and shale gas extraction via fracking. Hailed as the new Rachel Carson, she takes a personal and scientific look at these issues, offering insights into how we can protect our environment and our communities.

Tuesday, April 14, 2015 at 7:00P.M.
Phipps Auditorium, Macmillan Hall

This event is free and open to the public
Due to limited seating, this is an advance ticketed event

Turning the Tide: How Young Leaders are Winning a Just and Livable Future

Dominic Frongillo

Dominic Frongillo made history at age 22 by becoming the youngest person to serve on the Town Council in Caroline, New York. In 2012, he founded *Elected Officials to Protect New York*, a campaign of now over 800 elected officials across the state opposing fracking. Frongillo is profiled as one of America's 16 most notable young elected officials in Jeff Thigpen's new book *Young Politics*.

Drawdown Rising: Solutions, Leadership, and a Path Forward for the Climate Crisis

Humanity has faced urgent threats in the past, but never one as all-encompassing as the climate crisis. What's required is nothing short of societal transformation. The scale and speed of the task is daunting, yet there is a path away from crisis and toward a life-giving future for all. In this keynote, Dr. Katharine Wilkinson will speak to both what we can do and who we can be, to effect the change required. She will share highlights from *Project Drawdown's* pioneering assessment of climate solutions, as well as insights about catalytic climate leadership from people, organizations, and movements. Our collective wisdom is vast; now is the time for collective will to match it.

Dr. Katharine Wilkinson
Vice President of Communications & Engagement
Project Drawdown

Thursday, October 17, 2019 7:00PM
Phipps Auditorium, Macmillan Hall

This event is free and open to the public.

Be the Change!

You're just one in 7 billion people in a very confusing time on Earth. Is it possible for you to make a difference? Is it worth trying? Rob Greenfield's answer to these questions is a resounding "Yes!" and he is here to share why and how you can be the change you wish to see in the world. Through his lead-by-example activism, Rob's life has served as a wake-up call to millions of people and has changed the lives of many. Rob will share his unique projects - from diving into thousands of grocery store dumpsters, to wearing his trash for 30 days, to living off the grid in a tiny house, to his most recent year of growing and foraging 100% of his food - all designed to wake people up and instigate change. Although Rob takes his life to the extreme, his message is one of moderation. His work creates a counterbalance to the consumerist society we live in today and encourages mainstream media to report on important issues, while being able to use his attention-grabbing stories. You will walk away from this evening with a deeper understanding of the life that you are living and with solutions you can adapt to be the change you wish to see.

Rob Greenfield
adventurer,
environmental activist,
humanitarian, and
difference-maker
