

## Sustainability Perspectives

# *Enough is Enough* – Building a Sustainable Economy in a World of Finite Resources

**Rob Dietz**, program director for the *Post Carbon Institute*, will explain that nations around the world share a single unsustainable strategy when it comes to the economy: continuous growth. The pursuit of growth makes sense under some circumstances, but it has become dysfunctional, especially in high-consuming nations. With each passing day, we are witnessing more and more uneconomic growth—growth that costs more than it is worth. It's time to make a shift to a steady-state economy that can meet people's needs without undermining the life-support systems of the planet.
