

Liz Kreitinger took on the role of Steward / Executive Director for the Cayuga Lake Watershed Network in early 2022. She is a watershed ecologist with experience working for federal agencies (USGS and USFS), in environmental consulting, and holds an M.S. degree from the Department of Natural Resources at Cornell University where she is currently a Ph.D. candidate. Liz grew up in the fields, forests, and tributaries of the Cayuga Lake watershed and is incredibly grateful for the opportunity to serve our communities as CLWN Steward.
