

Sustainability Speaker Series

Grounding: From Theory to Practice and Back Again

Nance Klehm's work and being lies at the complex intersections of theory and practice. She seeks to embody the mundane magic of relationships built with land and place, to empower people to know and honor the complexities of social ecology, and to bridge the gaps between the folk hero day-to-day of skinned-knuckle activism, and the theoretical practices of the academy, gallery, or studio.

Her work as a communicator, translator, curator, medium and provocateur is internationally recognized in communities of practice ranging from publishing to fine art, environmental justice activism to philosophy, growing to podcasting. She lives her work—she writes, facilitates, lectures, teaches, consults, makes, and does.

Sharing some of her personal journey toward a more integrated and collaborative relationship with the land she lives and works on, Nance will be leading in-person and on-line participants in a mapping exercise that hopes to serve as an inspiring tool in reflection of how we are being and in dreaming futures.

Nance Klehm
Founder
Social Ecologies

Wednesday, December 1, 2021
7:00PM

DeWitt Lecture Room, Zabriskie Hall 106
and on-line via *MS Teams*

This event is free and open to the public.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, *Center for Sustainability and the Environment*, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.

This **Sustainability Speaker** series is sponsored by the **National Fenestration Rating Council (NFRC)**, an organization that holds sustainability as a guiding value. *NFRC* conducts objective, scientifically rigorous testing and rating of windows and doors that allows consumers, architects and contractors to make informed selections of fenestration products offering increased energy efficiency and building occupant comfort.
