

*Half of all marine life has been lost in the last 40 years.
By 2050 there will be more plastic in the sea than fish.*

The way the ocean operates is different from how we thought of it 100 years ago. We can no longer think of it as a place of limitless resources, a dumping ground, immune to change or decline. **BLUE** takes us on a

provocative journey into the ocean realm, witnessing a critical moment in time when the marine world is on a precipice. Featuring passionate advocates for ocean preservation, **BLUE** takes us into their world where the story of our changing ocean is unfolding. We meet those who are defending habitats, campaigning for smarter fishing, combating marine pollution and fighting for the protection of keystone species. 76 minutes **BLUE shows us there is a way forward and the time to act is now.**

Wednesday, February 19, 2020 ~ 7:00PM
deWitt Lecture Room, 106 Zabriskie Hall

Free organic popcorn with organic butter will be served.
