Sustainability Film Series

Before starting a family, Soozie Eastman, daughter of an industrial chemical distributor, embarks on a journey to find out the levels of toxins in her body and explores if there is anything she or anyone else can do to change them. Soozie has just learned that hundreds of synthetic toxins are now found in every baby born in America and the government and chemical corporations are doing little to protect citizens and consumers. With guidance from world-renowned physicians and environmental leaders, interviews with scientists and politicians, and stories of everyday Americans, Soozie uncovers how we got to be so overloaded with chemicals and if there is anything we can do to take control of our exposure. *Can we hit the reset button, or is it too late?* Runtime: 85 minutes

Tuesday, March 22, 2022 ~ 7:00PM
deWitt Lecture Room, 106 Zabriskie Hall

Light refreshments will be served courtesy of CSTEP.

This film screening is co-sponsored by the Center for Sustainability, and the Collegiate Science and Technology Entry Program (CSTEP).
