

Sustainability Perspectives

Tompkins Food Future: Toward a More Resilient, Equitable and Healthy Food System

Katie Hallas, Community Food System Plan Coordinator, will explain that Tompkins County is, by many accounts, a food-rich community characterized by agricultural abundance. Yet, observing the broader food system, it's clearer than ever: the current path is unsustainable. Characterized by extreme climate events, racial and economic injustices, ecosystem degradation, growing food insecurity, geopolitical instability, supply chain vulnerabilities and worsening public health outcomes, the time to transform our food system is now. *Tompkins Food Future* is building a more resilient, equitable, and healthy food system through community-driven planning and collaboration.

Monday, October 17, 2022 12:30 – 1:30PM

Zoom #: 848 1528 0517 Passcode: GdSJ?1wv

All *Sustainability Perspectives* series events are free and open to the public. The series explores the concept of 'sustainability' from a variety of viewpoints.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, Center for Sustainability and the Environment, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.
