

Sustainability Perspectives

Protecting and Promoting Water Resources of the Finger Lakes

Dr. Lisa Cleckner, director of the *Finger Lakes Institute*, will explain that water resources and natural capital such as landscapes and agriculture are the heart of the Finger Lakes and economy. In addition to supporting the tourism and agriculture industries that comprise over \$3B in economic activity in the region, the lakes provide drinking water to over one million residents in Upstate NY communities. Threats to the lakes and actions that citizens can take to protect the lakes will be presented.

This talk is offered in conjunction with *Water/Ways*, the traveling Smithsonian Museum on Main Street exhibit, in Aurora from August 16th - September 27th.

Monday, September 16, 2019 ~ 12:20 – 1:20PM
deWitt Lecture Hall, Zabriskie Hall Room 106

All *Sustainability Perspectives* series events are free and open to the public.
The series explores the concept of 'sustainability' from a variety of viewpoints.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, Center for Sustainability and the Environment, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.
