

Sustainability Perspectives

Our changing menu: What climate change means to the foods we love and need

Mike Hoffman, executive director of *the Cornell Institute for Climate Smart Solutions*, will explain that climate change is rapidly making the business of growing the foods we need and love less predictable and riskier. Almost everything on our food and beverage menu is changing – some obvious and some subtle and ominous. The challenges that face our local to global food system will be discussed along with solutions, including research and educational efforts underway at Cornell University.

Monday, September 30, 2019 ~ 12:20 – 1:20PM
deWitt Lecture Hall, Zabriskie Hall Room 106

All *Sustainability Perspectives* series events are free and open to the public.
The series explores the concept of 'sustainability' from a variety of viewpoints.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, Center for Sustainability and the Environment, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.
