

Sustainability Perspectives

Sustainability Science

Jason Hamilton, professor and chair of Environmental Studies and Sciences at Ithaca College, is a consultant for businesses and other institutions implementing sustainability programs as well as an educator and researcher in sustainability science and global change biology. Dr. Hamilton calls himself “a user-friendly scientist.” In his ecophysiological research, he studies how endangered insects are affected by climate change and elevated carbon dioxide in the atmosphere, and how those changes affect ecosystems.

Friday, February 20, 2015 ~ 12:20 – 1:20PM
Stratton Hall Room 209

This presentation is being held in conjunction with the **Science Colloquium**.

All *Sustainability Perspectives* series events are free and open to the public. The series explores the concept of sustainability from a variety of viewpoints.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, Center for Sustainability and the Environment, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.
