

Sustainability Perspectives

"Does a River Still Run Through It? Water and Culture Along the Upper Missouri"

Ernie Olson, professor of anthropology and religion at Wells College, will discuss his summer research in Montana. Fed by snowmelt from the Rockies, the Missouri River, with the support of sister rivers such as the Milk and Yellowstone, is a vital green line meandering through the dry plains and badlands of Eastern Montana. However, the 21st century brings great challenges to the vitality of Missouri River ecosystem and this presentation will offer some ways to ensure the future health of the river.

Monday, October 5, 2015 ~ 12:20 – 1:20PM
Stratton Hall Room 209

All *Sustainability Perspectives* series events are free and open to the public.
The series explores the concept of sustainability from a variety of viewpoints.

Wells is committed to providing access to all events; anyone needing assistance should contact Marian Brown, Center for Sustainability and the Environment, at 315-364-3304 or by email at mbrown@wells.edu, as soon as possible.

The education of an extraordinary life.
